PTC Creo CAD

1 octombrie 2021

This workshop is dedicated to everyone who wants to learn about Creo Parametric, how to create CAD models, assemblies and associated engineering drawings using Creo Parametric.

You will be also introduced to Finite Element Analysis using Creo Parametric, and you will learn how to quickly analyze and adjust your design.

Agenda

10:00 - 18:00	• Basics of Part Design Process • Fundamentals of Assembly Design Process • Fundamentals of 2D/3D Drawings • Basics of Finite Element Analysis • Real-Time Simulation – Creo Simulation Live Demo • Q&A Session
